

**Questions:**

It appears that from all of the studies conducted and paid for the police department upgrade was #1 and Town Hall facilities was #2 priority. Refurbishing two schools was never on the table. Building from ground up also does not seem to be on the table, why isn't this one of our options being explored and part of the costs considerations? Taxpayers deserve to see more than one option and understand the thinking around proposal, costs, pros and cons and what is best for the town both short term and long term. if I missed this in the various meeting minutes then please provide where this thought process is documented and how we weighed the options for all to understand the decision to head down this path?

**Answer:**

The following is a link to the Facilities Committee report that looked at the various options for facilities:
